

Here is an example of how you can use a **Duraline®** Power Tap Streamer in your system.

The above illustration shows how you can use a **Duraline®** Power Tap Assembly to provide specific power connections to specific work areas. Power drops and lighting drops can be made in any combination, as long as the maximum available amperage is not exceeded.

Please contact us, so we can work with you to design your **Duraline®** Power Tap Streamer.
